Bargaining Update

July 23, 2021

Agreement On Strike Deadline Extension

Sisters and Brothers, your committee has been working hard throughout the day and now into the night to reach a new collective agreement. There were constructive exchanges earlier in the day where the Union pressed the Company on the lack of movement on our key issues.

In the minutes leading up to the deadline, the Union thoroughly considered a request from the Company to extend the deadline or to contact a mediator to assist the parties.

The Union has agreed to extend the deadline by 24 hours to midnight on July 24 giving us an opportunity to satisfy the mandate given to us by the membership.

At this time, we ask the membership to be patient and give our committee the opportunity to see what can be achieved before withdrawing our services.

The Union thanks the membership for their solidarity and for giving us the strongest mandate in our history to push the Company as far as we can in achieving our demands.

We will keep you informed as things transpire, please follow our member Facebook group, the Union's website and your email for updates.
